

This instruction is intended for persons who are students of the Opole University of Technology. To set up a university e-mail account in the Office 365 service, follow the steps below in the indicated order.

Step 1

Go to the website <https://estudent.po.opole.pl> and log in with your account credentials. Please remember to correctly rewrite the code from the picture. If you have accidentally failed to store your credentials when creating an account or if you have forgotten them, you can use the password reminder option.

Use EduRoam

Use WiFi for free,
You will find more info in Services

Microsoft Office 365
Use a free e-mail account, be in touch with the dean's office and lecturers.
Thanks to the account in Office 365 You will be able to use the free software by programs such as: DreamSpark (including MS Office), Photosynth, Autodesk.

Step 2

After logging in to the eStudent portal, activate the e-mail account in the domain @student.po.edu.pl, in the Office 365 service. To do this, select the *Software option (Office 365)* from the main menu and then the option "Create an account". Continue following the on screen instructions.

The e-mail account will be associated with you throughout the period of your study at the Opole University of Technology – it will be used for contacts with the Student Service Center] as well as with lecturers conducting your courses. By means of that account you will also gain access to other services and programs. Details are available on the eStudent portal.

When creating your e-mail account, in addition to the name you choose, the account will be automatically assigned a so-called *alias*, with your student ID number preceded by the letter "s", e.g.: s12345@student.po.edu.pl

Messages sent to the domain *alias* will automatically be forwarded to the primary account.
